LECTURE

Computer-animation pioneer to speak at OSU

During his college years in the 1940s, Chuck Csuri was a football star at Ohio State University.

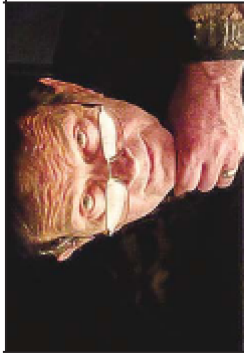

After graduation, he turned down offers to play the sport professionally in favor of studying art in graduate school.

Today, Csuri, 86, is considered the "father of digital art and computer animation."

He will give an interactive presentation on computer and digital art — "Beyond Boundaries" — at 12:30 p.m. Thursday in BALE Theatre of the Ohio Supercomputer Center, on the West Campus of Ohio State University.

Csuri will showcase his work in computer imaging, algorithmic painting and more.

"Art takes place outside the

Chuck Csuri

machine," he said. "I try to play at the edge of reason and absurdity."

The lecture will be carried live on the Internet.

To register to attend in person or remotely, visit www.irscs.org/lecture_series. For more information, call 614-292-9248.

Wondrous Spring by Csuri
